

GATE KIT (components included in this kit)

960mm x 950mm Gate, Hinge Pack, Latch & Lock.

1. The gate is designed to align with the balustrade when using supplied Pickets in the Balustrade Kits. The top of the gate should be fitted in line with the top of the balustrade rail.
2. For a 960mm wide gate the distance between posts should be 1000mm to allow for gate hardware.
3. The Bottom of the gate can be identified by 2 x drainage holes.

4. The hinge and latch pack contains all fixings for fitting to a timber reinforced post.
5. Hinges are normally placed on the deck-side of the post and gate.
6. The gate has timber reinforcement inside both vertical sides for the attachment of hardware.
